# AMERICAN PROFESSIONAL Saxophones

American Professional Saxophones have for years been leaders. They are found everywhere in the hands of prominent musicians, both professional and amateur.

The experienced saxophonist will at once find every little detail to measure up to his exacting standard. Intonation, evenness of scale, perfect tone, easy playing qualities—he will be impressed with these important features from the start.

Great care is taken in adjusting the saxophone keys and springs. As a result the action is light, responsive, quiet. Metallic noises, so characteristic of many saxophones when first attempted, are entirely eliminated.

## RICH, BEAUTIFUL

After all, the most important feature of a saxophone is its tone. American Professional Saxophones have that. Faultless tone is the result of a tifically correct body thickness, proper proportions of the bell, and careful workmanship.

## PAD ECONOMY

Pad economy is something that every saxophonist. The body sockets of the American Professional Saxophones are of unusually wide face. This means that they will not wear out. The sockets are welded, not soldered to the body. The pads, in addition to lasting a long time, will not get out of adjustment easily. The sockets will never leak or come loose.

## FINAL INSPECTION

Final inspection before the saxophone leaves the factory assures you of receiving a perfect instrument. Everything is inspected—workmanship, adjustment of keys and finish particularly. Every instrument is tested with reed and mouthpiece intended for it.

## PITCH

All American Professional Saxophones are in International or low pitch 440.

## FEATURES

Extra key, enabling player to pass low B $\flat$  to E $\flat$ ; B $\flat$  to E $\flat$  key; extra key to trill G to A $\flat$ , and a greatly improved form of automatic single octave key. All standard fingerings, such as the artic-

ulated G $\sharp$  key, B $\flat$  plate for first finger of left hand, F to G $\flat$  trill key, are included. All instruments are supplied with fine rubber mouthpiece, mouthpiece cap, music rack, neck strap, screw driver, extra reeds and instruction chart. All this means much to the professional—and to the beginner unfamiliar with the saxophone it means protection. All American Professional Saxophones are furnished with pearl keys and ebonized rollers.

## SO EASY TO LEARN

To play the saxophone is not a question of unusual musical ability. Modern methods of instruction have made it possible for everyone to learn to play for a short period of time and obtain splendid results. Do not let the thought that you lack talent hold you from the joys that come with playing a musical instrument yourself.

## GOOD TIMES

Alone a saxophone is a cheerful companion when you are with your friends. When you play music they enjoy listening and endless good times are opened to you. Parties, club meetings, home orchestras, all filled with music, song, laughter and joy.

## POPULARITY

Notice how much in demand the saxophone is. Young people are wanted for indoor and outdoor gatherings of every kind. About the resorts and outdoor places of amusement in summer, they are always the center of attraction.

## MONEY

There is another angle that should not be overlooked; it is the professional field. The saxophone offers bright futures to young men and women. The salaries in this field are very alluring, and the demand for players is always increasing. You may have other ambitions; but it is well to have an accomplishment that you can rely upon to bring you a comfortable income, should the occasion arise. Saxophonists earn, for a few hours' pleasurable work, a gratifying salary. They are living examples of the desirability of playing the saxophone.

Play Simple Melodies in an Hour

You Can Play a Simple  
Melody in an Hour

# The AMERICAN PROFESSIONAL C Melody Saxophone

The Popular Home Instrument

This is the ideal home instrument. The young person who wishes to take up the saxophone principally for personal enjoyment will find the C Melody the easiest to learn. Vocal, piano, violin, flute, oboe and 'cello parts can be played without transposing. The beauty of this saxophone's tone is a delight to the ear. The key action, due to careful adjustment, is light and easy, assuring rapid and sure fingering of complicated passages. The range is an octave lower than that of the C Soprano. All finger tips and upper thumb rest are pearl inlaid. Mouthpiece, mouthpiece cap, music rack, neck strap, screw driver, extra reeds and instruction chart are furnished with each instrument.

*Quality and  
Workmanship  
Guaranteed to be the Best*

**B $\flat$  TENOR SAXOPHONE**

The Tenor Saxophone continues to rise in popularity. It is a favorite dance orchestra instrument. Its mellow voice makes it an indispensable part of saxophone quartettes, sextettes, and octettes. In the band, trombone and other parts can be played without transposing. The splendid tone and action of the American Professional Tenor makes it an instrument upon which the player can do his best work. The range is an octave lower than that of the B $\flat$  Soprano Saxophone, but it has two additional high tones, E $\flat$  and F. All finger tips and upper thumb rest are pearl inlaid. Furnished with mouthpiece, mouthpiece cap, music rack, neck strap, screw driver, extra reeds and chart.

*Unusual Musical Talent Is Not Necessary*

The E $\flat$  Baritone is suited for all group playing—in the band, the orchestra and various saxophone combinations. It is also a splendid solo instrument. The American Professional Baritone is equipped with all modern improvements. In intonation, tonal quality, ease of blowing, finish and mechanical perfection it meets the highest standards. The range is an octave lower than that of the E $\flat$  Alto, without the high E $\flat$  and F. All finger tips and upper thumb rest are pearl inlaid. Furnished with mouthpiece, mouthpiece cap, music rack, neck strap, screw driver, extra reeds and chart.

*Bring Music into Your Life*

# "How an Hour's Daily Practice on the Saxophone Brought Me a Salary I Dared Not Dream of a Year Ago"

"The saxophone outfit cost me about \$110.00. It was an instrument that produced returns a hundred-fold and more."

"I found a good teacher. The first lesson brought the enthusiasm of a boy with a new bicycle to me."

"Practice was great fun. I surprised myself by being able to pick out 'Home, Sweet Home' in an hour."

"With progress came side-jobs. I soon paid for my instrument and lessons, and had many hours of enjoyment besides."

"Now I am with a famous dance orchestra, at a salary that exceeds my fondest hopes of a year ago."

## A True Story

This is a true story of the progress made by a young man who capitalized his ability to play. It has been repeated thousands of times, everywhere in the country. It can be repeated in *your* case. When you consider that you need no unusual musical ability to learn, is there any good reason for delay? You need only say to yourself, "*I am going to do it; I will not let other things interfere.*" For beginning is half the deed.
